

AP Universal Plates

Halcyon stocks a range of “Universal” style plates in common inside/outside diameter combinations for adapting a range of different sized Halcyon downlights to suit various hole sizes. Universal style adapter plates are installed between downlight and ceiling surface, held in place via the existing downlight spring clips. Halcyon product specific "flush fit" adapter plates are also available for a more professional appearance.

Universal adapter plates are cut from steel and powder coated White or Black with a subtle textured satin finish to best match ceiling roller paint finish and texture. White powder coat plates are a neutral/crisp "black white" finish designed to match a wide range of popular modern white colours (Similar to Resene Alabaster or Black White colour families). If using Halcyon plates with old or non-Halcyon downlights or using the plates with unknown paint finishes, purchase a single plate to test colour match first.

Specifications

Finish	Powder coated, slight textured satin finish. Black or White
Material	Steel
Application	Interior

Available In

Description	Code
White, ID 72mm OD 115mm (W43mm)	AP-72-115-W
