WiFi Garage Door Opener

Universal

Works with all brands of garage door openers

Control from any web browser,
mobile phone or tablet

Distributed in New Zealand by Newfield Group

The GarageSmart™ is the World's First Universal WiFi Garage Door Opener with these features:

- Open, close or check the status of up to three garage doors from anywhere in the world
- Works on all brands of tilt, roller or sectional automatic garage door openers
- Operates with any smartphone, mobile phone, tablet or web browser
- Automatically close doors at a preset time of day
- Automatically close doors depending on outside weather conditions (e.g. rain, wind, temperature etc)
- Receive notifications via email or SMS text message when your doors open or close
- Grant access to other users with settable time/date limits (e.g. neighbour or delivery man)
- Activity log showing the door activated, operation (open/close), date/time and user (i.e. Kevin)
- Can be DIY installed in less than 20 minutes

Accessories

S6/S7/R5 Remote

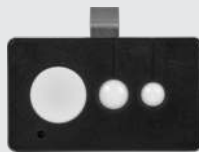

163RCU4

4 Button Remotes with rolling codes for enhanced security. Very easy to programme and multiple remotes can be used on each garage door system. Suitable for S6 and R5 motors.

S6/S7/R5 Visor Remote

163VRCU

Three Button Visor Remote designed to be mounted inside the vehicle. Simply clip onto your sunvisor – no wiring is required. Suitable for S6 and R5 motors.

S6/S7/R5 Wireless Wall Switch

163WWS1

Three Button Wireless Wall Switch designed to be mounted inside the garage. Easy to mount and no wiring is required. Can also be used in vehicles. Suitable for S6 and R5 motors.

S6/S7/R5 Wireless Keypad

163RSP

The Wireless Keypad has 4 separate channels which can control 4 separate devices. Devices are usually automatic garage doors or automatic gates.

Roller Weight Bars

163RWB

Roller Weights are mounted on the bottom of roller doors to add extra weight which will prevent the roll from bunching up at the top. These come in a pair at 1kg each.

Roller Drive Fork Extensions

163REB

Roller Drive Fork Extensions extend the length of the fixed drive forks if they do not extend far enough into the roller door mechanism to engage properly.

Roller Manual Extension Arm

163RMEA

Roller Manual Extension Arm extends the manual disconnect arm supplied with the unit. This is only required for garages with higher ceilings with a higher mounted drive unit.

Battery Backup

163BBU

Battery Backup can be added to any garage door opener to ensure the door will continue to operate in the event of a power outage. After power resumes, battery will recharge.

Safety Beam Sensor

163PSB

Safety Beam Sensor system is mounted internally just inside the door and will stop the door closing if it detects an obstruction such as a person or a vehicle that crosses the beam.
