A BRILLIANT RANGE OF SWITCHBOARDS TO

4 SERIES

**consumer switchboards
and components**

Clipsal has developed the ultimate consumer switchboard system. With surface and recessed switchboards in economical or deluxe versions, Clipsal has a model to cater for every possible need.

Built with the electrical contractor in mind, the range includes time saving clip rail and RCD models. Our deluxe models are 100% Australian made and offer generous wiring room and an extensive choice of mounting positions and colours.

All small and medium switchboards in the range are constructed of durable, fully insulated plastic, with larger models made of heavy duty metal.

MEET THE NEEDS OF EVERY CONTRACTOR

Catalogue Number Format and Legend

The following legends provide a brief explanation of the numbering system for consumer board catalogue numbers.

4 **XX** **X** **XXX** **X**

- 4** Consumer Range Primary Number.
- C** Surface Mounted Deluxe Consumer Switchboard. CR and RCD version dedicated to Clipsal 3, 6, 8kA Circuit Breakers.
- P** As for C above except CR and RCD version dedicated to Clipsal 10kA Circuit Breakers.
- FC** As for C above except flush.
- CC** Economy Consumer Switchboard.
- xxW** IP34 Rating or better.
- X** Number of Modules.
- CR** Clip Rail.
- FD** Full DIN.
- RCD** Residual Current Device.
- L** Lid.
- MB** Mounting Block.
- WB** Wall Box.
- SF** Spacer Flange.
- FK** Flushing Kit.
- G** Grid Assembly.
- Blank** Complete Switchboards.

4C/4P SERIES PLASTIC DELUXE SURFACE MOUNTING CONSUMER SWITCHBOARDS

The requirements of the electrical contractor have always been of prime importance to Clipsal. This is more than evident in the 4C and 4P Series of switchboards, which have been designed to enable speedy wiring, accessory mounting and installation.

This premium range of Consumer Switchboards is available in cream and white with transparent beige or grey lids. Opaque cream and white lids are also available; refer to the accessories section for further information.

4C/4P - FD Range - Full DIN

Plastic Deluxe Surface Mounting
Consumer Switchboards

Features

- Available in Cream or White to suit every decor
- More than ample cable entries and mounting points
- Generous wiring room
- Loose busbar supplied for quick and versatile connection to line side of circuit breakers
- Comprehensive range of legend stickers
- Generous earth and split neutral bars are provided and located for ease of wiring. Large size MEN terminal included for termination of cables up to 35mm².

4C6FD

Back plate comes complete with large removable panels and cutouts for ample cable entry room.

Moulded from insulated material for electrical safety

Shatter resistant transparent flap allows tripped breakers to be instantly detected

Side cutouts provided on all sides for easy cable and conduit entry

Back plate is removable for easy retrofit of old meter box installations

Full DIN Rail which allows freedom in installation of special items such as clocks, timers and changeover switches

4C17FD

Clipsal "Time Savers"

These Consumer Switchboards incorporate time saving features for the installer, one of which is a Main Switch already mounted to the permanently fixed Busbar.

The unique 'drop in' Clip Rail then makes it easy to install MCBs.

4C/4P Range CR Clip Rail

Plastic Deluxe Surface Mounting Consumer Switchboards

Clipsal 4C - 4P Clip Rail Consumer Switchboards are designed for fast installation, saving you valuable time.

Australia's first half DIN system to suit 6, 11 and 17 way consumer boards. The unique clip rail saves installation time.

Features

- All the benefits of the full DIN Rail
- Pre-connected isolator (80A). Just terminate submain. Saves you ordering and installation time. Large size terminal bore for installation up to 35mm²

All the benefits of full DIN Rail

Permanently fixed busbar - just drop circuit breaker into clip rail and terminate

All the benefits of the Clip Rail

4C/4P Range RCD

Plastic Deluxe Surface Mounting Consumer Switchboards

Each Switchboard in this range includes all of the time saving devices listed above, with the addition of a pre-wired and connected RCD device.

This saves the installer valuable time in ordering and installation.

Features

- All the benefits of the full DIN Rail
- Pre-wired and connected 40A 30mA residual current device. Simply drop circuit breakers onto protected clip rail and terminate
- Pre-connected isolator (80A). Just terminate submain. Saves you ordering and installation time. Large size terminal bore for installation up to 35mm²

4FC SERIES PLASTIC DELUXE FLUSH MOUNTING CONSUMER SWITCHBOARDS

As with the surface mounted 4C Series, the 4FC Series flush mounting enclosures have been designed for speedy wiring, accessory mounting and ease of installation. All features are designed to substantially benefit the contractor.

The wall box is solidly constructed, zinc plated steel for maximum corrosion resistance and suit plaster, concrete or timber framed installation.

Features

- Available in Cream or White to suit every decor
- Numerous cable entries and mounting points
- Comprehensive range of legend stickers
- Loose busbar supplied with full DIN models
- Generous earth and split neutral bars are provided and located for ease of wiring. Large size MEN terminal provided for termination of cables up to 35mm²

4FC17FD

Door left or right hand hinged to suit every application

Zinc plated for maximum corrosion resistance and suits brick, plaster, concrete and timber framed installations

Shatter resistant aesthetically pleasing plain door

Generous wiring room

4CC SERIES PLASTIC ECONOMICAL SURFACE MOUNTING CONSUMER SWITCHBOARDS

Available side or back wired these economical switchboards are ideal for modifying existing panel type switchboards. All switchboards come complete with 35mm DIN mounting base and can handle 18mm wide mains isolators, DIN mounted accessories, residual current devices, circuit breakers and combination RCD/MCB circuit breakers. A full set of pole fillers are provided with each enclosure. The switchboards are double insulated allowing installation onto metal surfaces.

Safety is an important feature in all Clipsal designs and our 4CC Series is no exception, featuring double insulated, impact resistant mouldings.

Designed to give generous wiring room for incoming cables, the 4CC Series is an economical switchboard for use in most applications.

Features

- Front or back wired with ample cutouts for every application
- Double insulated for operator safety
- Comprehensive range of legend stickers

4FCC SERIES PLASTIC ECONOMICAL FLUSH MOUNTING CONSUMER SWITCHBOARDS

Clipsal horizontal row economical recessed enclosures are now available. All switchboards come complete with 35mm DIN mounting base and can handle 18mm wide mains isolators,

DIN mounted accessories, residual current devices, circuit breakers and combination RCD/MCB circuit breakers. A full set of pole fillers is provided with each enclosure.

Features

- Full DIN mounting facility
- Ample wiring entries
- Generous earth and split neutral bars are provided and located for ease of wiring. Main neutral termination for cables up to 35mm²
- Comprehensive range of legend stickers

4CW/4FCW SERIES WEATHERPROOF/HOSE- PROOF PLASTIC DELUXE SURFACE & FLUSH MOUNTING CONSUMER SWITCHBOARDS

Clipsal have several weatherproof and hoseproof enclosures to prevent ingress of dust and water.

The IP34 rated enclosures are ideal for damp areas such as laundries and kitchens where AS3000 calls for a higher rating. Our IP56 enclosures offer the highest protection and are therefore even suitable in wash down areas.

Features

- Quality numbered split Neutral and Earth Bars supplied. All feature large cable bores and two terminals per tunnel
- More than ample cable entries and mounting points
- Comprehensive range of legend stickers
- Loose bus bar supplied with every enclosure

Note:

4CW11FD, 4FCW11FD & 4FCW17FD are compatible with grids shown in the accessory table on page 7. IP Rating reference chart at rear of catalogue.

4C/4P SERIES METAL DELUXE SURFACE MOUNTING CONSUMER SWITCHBOARDS

For single and three phase commercial or large domestic applications the metal consumer range is ideal. Mounting points cater for up to 8mm fixings and each unit is provided with ample knockouts for quick and easy installation.

All boards are made from rugged 1.2mm zinc annealed steel construction and powder coated beige for unobtrusive good looks. Enclosures include a removable fascia panel that makes wiring, MCB fitting and maintenance a breeze.

80 and 150 Amp. Models available.

Features

- Up to 42 hole neutral bar and 42 hole earth bar provided and located for ease of wiring and grid assembly
- Busbar and main switch assemblies interchangeable (to suit top or bottom cable entry)
- Main switch fitted as standard (except 4C48FD model)
- Slotted mounting holes for 8mm (5/16") fixings

Accessories

4C30FK	Flush mounting conversion kit - to suit 4C30 Series
4BB30K	150A 30 pole Busbar Chassis Assembly - to suit 3, 6 & 8kA Clipsal Circuit Breakers
4BB30P	150A 30 pole Busbar Chassis Assembly - to suit 4.5 & 10kA Clipsal Circuit Breakers

4 SERIES SUNDRY PARTS

These sundry parts can be used with any 4 Series enclosure.

4 Series Sundry Parts	
4F1	Half Module wide Filler for Enclosures
4P8	8 Module wide Filler Strip for Enclosures

4 SERIES POWER RANGE

Refer to separate Technical Catalogue on 4 Series Power Range for further details

4CB120/10

To complement the 4 Series Consumer Switchboard Range, Clipsal introduces the 4 Series Power Range, with everything you need for your domestic, commercial or industrial switchboard requirements.

Included in the Power Range are MCBs, RCDs, MCB/RCD combinations, isolating switches, changeover switches and busbar systems. A huge variety of accessories are also available to complement the range, including auxiliary contacts, shunt trip and voltage protection devices, push-buttons, audio and visual signalling devices, timers, relays, contactors, counters and transformers.

The Power Range can cater for all applications, with MCBs available from 1 to 125 amps, RCDs in 2 and 4 pole versions from 25 to 100 amps, and MCB/RCD combinations in 2 pole versions from 10 to 40 amps.

4TCD

Housing for all mainstream devices is of sturdy, self-extinguishing material in a neutral grey colour to suit most switchboard designs. Each has colour coded toggles for easy and safe amp-size identification, 'lift-up' terminals with combination head screws and a status indicator window with a red/green colour coded flag that is coupled to the contact mechanism. Additional safety is provided with 'ON' and 'OFF' text in contrasting colours on toggle mechanisms.

All devices are for 35mm DIN rail mounting with a two position DIN clip of heavy duty moulded material. Where applicable, they are constructed to standard with provisions for quick, easy and safe field application of auxiliary contacts and shunt mechanisms. Locking mechanisms and sealing wires are also provided when required.

INTERNATIONAL PROTECTION RATINGS

	TEST	PROTECTION
X	No test applied	No specific protection.
0	No test applied	Inherent degree of protection.
1		Protected against solid objects larger than 50mm (eg. accidental contact with hand.)
2		Protected against solid objects larger than 12mm (eg. contact with finger.)
3		Protected against solid objects larger than 2.5mm (eg. tools and wires.)
4		Protected against solid objects larger than 1mm (eg. fine tools and wires.)
5		Protected against dust. Prevent entry in sufficient quantity to interfere with satisfactory operation.
6		Completely protected against dust.

Defined by
IEC 529
DIN 40050
CEI 70-1

To Australian Standards AS 1939 - 1991
'Classification of degrees of Protection' Provided
by enclosures for electrical equipment.

	TEST	PROTECTION
X	No test applied	No specific protection.
0	No test applied	Inherent degree of protection.
1		Protected against drops of water falling vertically.
2		Protected against drops of water falling at up to 15° from the vertical.
3		Protected against spraying water at up to 60° from the vertical.
4		Protected against splashing water from all directions.
5		Protected against jets of water from all directions.
6		Protected against jets of water of similar force to heavy seas.
7		Protected against the effects of immersion.
8		Protected against the effects of submersion.
