Product Environmental Profile

Resi9 SB Flush Enclosures

as referent product for :

All Enclosures in the Resi9 range

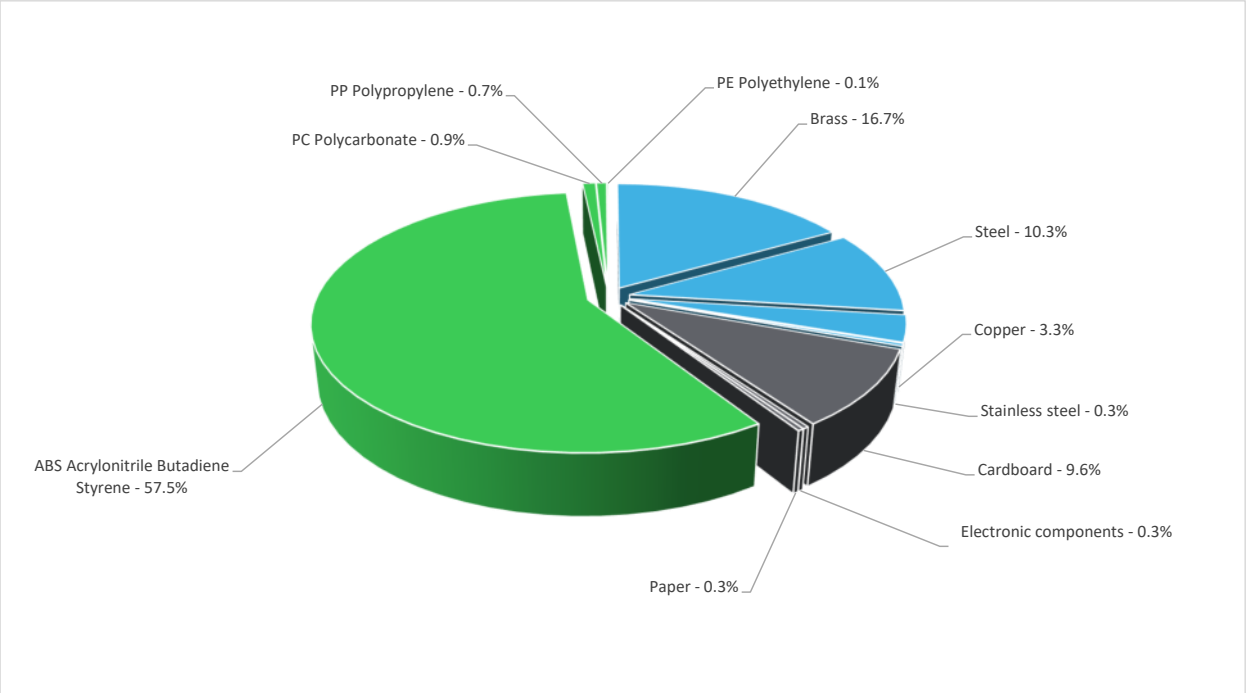

General information

Reference product	Resi9 SB Flush Enclosures - R9HSB215F
Description of the product	Resi9 Enclosures allow installation and protection of electrical devices while ensuring protection and safety of persons, they are intended for residential sector.
Description of the range	The indicators values of this Resi9 SB Flush Enclosure can be extrapolated, based on the Mass and Energy values of the products, for other enclosures in the range. The environmental impacts of this reference product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	Protect persons during 20 years against direct contact with live parts and allow grouping monitoring, control and protection devices in the enclosures having the following dimensions 395 x 380 x 107mm, with COMB Busbar and Neutral bar operating at 63A, while protecting against mechanical impacts IK07 in accordance with the standard IEC 62262 and the penetration of solid objects and liquids IP40 in accordance with the standard IEC 60529.

Constituent materials

Reference product mass	2890 g	including the product, its packaging and additional elements and accessories

	Plastics	59.2%
	Metals	30.6%
	Others	10.2%

Substance assessment

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

End Of Life	Recyclability potential:	**33%**	Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the "ECO'DEEE recyclability and recoverability calculation method" was taken. If no data was found a conservative assumption was used (0% recyclability).

Environmental impacts

Reference service life time	20 years
Product category	Other equipments - Passive product - continuous operation
Installation elements	The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).
Use scenario	load rate / rated current (In): 30 % of In percentage of utilization time: 100%
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production.
Geographical representativeness	New Zealand
