Socomec Digiware Q-800 Advanced Power Quality Analyser with Display RS485 Ethernet USB

POWER ANALYSERS

Component type	Power quality analyser
Range	DIRIS Q-800
Model	N/A
Product status	New Item

The DIRIS Q-800 is an advanced power quality analyser with a large touch screen for local analysis and a wide range of communication protocols for remote monitoring. It has a wide range of power quality analysis functionalities such as waveform capture, harmonic analysis, voltage interruptions and event logging. The embedded web server offers real-time remote monitoring.

ELECTRICAL	Apparent power	Yes
	Current measurement	With current clamp meter/clamp adapter
	Current supply	Mains power supply
	Effective power	Yes
	Number of current input channels	4
	Number of voltage input channels	4
	Power factor	Yes
	Reactive power	Yes
	Voltage measuring range/AC direct	0-1000 V
CONSTRUCTION	Interface	Yes
MECHANICAL	Indication	Graphic
DIMENSIONS	Measured value memory	Yes
