

Supreme JET DRY EXECUTIVE II

High Speed, Energy Efficient, Hygienic

- Faster – Ultra fast dry time
- Quieter – Latest electronic brushless motor, extended life and energy efficient
- Cleaner – Water collection tray and long life HEPA filter
- Greener – Faster dry time and low running costs of up to 80%

Supreme JET DRY EXECUTIVE II

The Supreme JET DRY EXECUTIVE II uses a high powered brushless motor to create warm air that will dry hands in 10-15 seconds. A fast dry time combined with low power consumption makes it better for the environment, saving both money and reducing your carbon footprint. The JET DRY EXECUTIVE II is incredibly quiet compared to similar model and has a freshener pod, creating a natural aroma that is both relaxing and refreshing. A triple antibacterial HEPA filter prevents the spread of bacteria and viruses, keeping the unit clean and hygienic at all times.
